MIG Refractory Products offers a complete turn key fabrication shop at the Princeton Illinois complex. We fabricate new components as well as repair your in-service components. We have the capability of engineered CAD drawing capabilities to meet and exceed all of your companies needs and requirements.

At MIG Refractory Products we engineer new oscillators and have the ability to repair your Oscillator at our Princeton Illinois complex returning the customers equipment to “as new” condition. Also on hand we have a Dyna Flex Oscillator as well as several molds are on hand and available for sale Also we have a set of molds on hand as-If anyone is interested please feel free to contact us for more information.

MIG REFRACTORY PRODUCTS INDUSTRIES SERVED

STEELMAKING/
IRONMAKING/
ALUMINUM/
CEMENT

PRODUCTS AVAILABLE

- Mag Carbon Brick
- Mag Chrome Brick
- Mag Dolomite Brick
- Resin Bonded Dolomite Brick
 - AMC Brick
 - Fire Clay Brick
 - Silica Brick
- Fused Silica Brick
- Ceramic Fiber Blanket, Rope, Board
 - Insulating Fire Brick
- Caster Components, Dummy Bars, and etc.
 - Coke Oven Machinery
 - Coke Oven Components
- Brick for Aluminum, Cement, and Glass Industries
 - Iron and Steel Making Components
- Refractory Castable, Ramming material, Mortars
 - Stainless Steel Flex Hoses

MIG Refractory Product of the Month

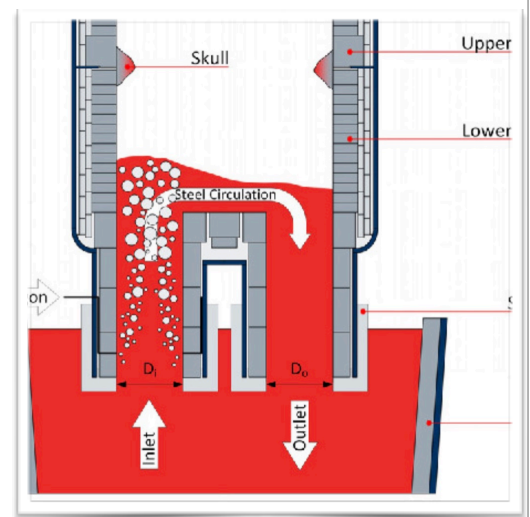

RH Vacuum Degassing uses a circulation process for hydrogen removal from the liquid steel. It is also increasingly being used for secondary refining and has become important component of secondary steel making.

MIG Refractory Products RH Degasser Refractories:

•ML series quality Mag Chrome Bricks with different Cr₂O₃ percentage for snorkels, upper and lower parts of the Degasser vessel

•Pre-assembled snorkels ready for a quick installation

For your RH Degasser needs feel free to contact us and we will be happy to assist you with any questions. We will be more than happy to work with you to improve your product reliability.

MIG Refractory Ceramic Welding Project at JSW Dolvi Works India

Ceramic welding on Phase 2 of the JSW Dolvi Works India has begun. Under this phase there will be a total of 50 ovens to be ceramic welded on Pusher Side and Coke Side. Most of the repaired areas are spalling in the oven chamber along with repairing of undercuts along the floor. Current ceramic welding is on schedule. Sanjay Savant is our job site Coordinator for this project, This has been a difficult task with the virus restrictions but when JSW needed these repairs our India team worked together to make this happen. Thank you Alpesh, Sanjay and our India Team.
